NOTES

An Auxiliary to the DeSoto-Hardee-Highlands County Medical Society was organized on the evening of April 14, at Wauchula, where the members of both organizations had dinner together. Mrs. J. R. Wells motored over from Daytona Beach, with Mrs. J. E. Taylor, in order to help DeSoto-Hardee-Highlands County organize. A most enthusiastic meeting was held and the following officers were elected: President, Mrs. M. C. Kayton; vice-president, Mrs. G. S. McKnight; secretary-treasurer, Mrs. L. W. Martin. We welcome most heartily this new organization and hope to hear frequently from its publicity chairman, Mrs. John A. Simmons of Arcadia.

SIMPLICITY

To each measure of S. M. A. ADD One ounce of boiled water → One fluid ounce of S. M. A. ready to feed.

S. M. A. is simple to prepare
. . . and requires no modification

Breast milk is simple for the physician to prescribe, yet no physician ever refuses to prescribe it on account of its simplicity, its simplicity, on the contrary is one of the many advantages of breast milk. S.M.A., an adaptation to breast milk is likewise simple to prescribe and prepare and requires no modification for normal full term infants.

May we send samples?

S.M.A. CORPORATION
CLEVELAND, OHIO

For Abdominal Muscles
that Have Begun to Sag

When, with advancing years, supporting abdominal muscles lose vitality, allowing a sagging of depleted tissue, Camp Supporting Garments bring to the body new vigor and fitness. This model, well adapted for the use of the middle-aged man with long abdominal line, holds the body alert and "at attention", improving appearance and health, gives assuring comfort and overcomes prolapsus tendency. The Camp Patented Adjustment (a feature of all Camp Garments) provides easy manipulation and controls the desired tightness. Constructed of light weight material, this support is especially satisfactory for summer wear. Sold by the better drug and surgical houses.

MERCUROCHROME
220 SOLUBLE

(Dibrom-oxymercuri-fluorescein)

The Stain Provides for Penetration and Fixes the Germicide in the Tissues

Mercurochrome is bacteriostatic in exceedingly high dilutions and as long as the stain is visible bacteriostasis is present. Reinfection or contamination are prevented and natural body defenses are permitted to hasten prompt and clean healing, as Mercurochrome does not interfere with immunological processes. This germicide is non-irritating and non-injurious when applied to wounds.

Manufacturing Chemists
NEW ORLEANS

A characteristic of Mead's Powdered Lactic Acid Milk No. 1 (containing Dextri-Maltose) is the finely divided soft curd which never clogs the nipple. In a few moments, any mother can carry out the simple procedure required without error — a saving in time to her and an assurance to the physician that the feedings are correctly prepared. This product never curdles; it is always ready, and quickly reliquefied. No ice is necessary to keep the powder. It is convenient while traveling. Samples and literature on request. Mead Johnson & Company, Evansville, Indiana, U.S.A.

Any one can make belts, but belts which give compression without uplift may do serious injury

"STORM" The New "Type N" STORM Supporter

Pleases doctors and patients. Long laced back. Soft extension, low on hips. Hose supporters attached.

Adapted for ptosis, hernia, pregnancy, obesity, relaxed sacro-iliac articulations, kidney conditions, high and low operations.

Mail orders filled in 24 hours.

Please ask for Literature.

Katherine L. Storm, M.D.

Originator, Owner, and Maker

1701 DIAMOND ST. PHILADELPHIA

University of Maryland School of Medicine

and

College of Physicians and Surgeons

Requirements for Admission—Two years of college work, including English, Chemistry, Biology, Physics and a modern foreign language, in addition to an approved four-year high school course.

Facilities for Teaching—Abundant laboratory space and equipment. Two large general hospitals absolutely controlled by the faculty, and other hospitals devoted to specialties, in which clinical teaching is done.
